

Upgrade to Superior Performance with the PerForm 6 Recloser Control Retrofit Program

An extraordinary opportunity created especially for Cooper Power Systems customers.

The PerForm 6 retrofit program provides Cooper Power Systems Form 3A, Form 4A, Form 4C, FXA, FXB, and Form 5 control users the opportunity to upgrade their recloser controls to the Form 6 control, complete with ProView 4.0.1 application software, at a discounted price.

While the protection system design of these legacy controls is still applicable today, system optimization now includes additional requirements such as full power metering; SCADA and DA applications; advanced data logging through oscillography and event recorder; and extensive user customization. Feature enhancements continue to be software driven and downloadable to existing hardware.

Cooper Power Systems offers this recloser control technology at an affordable price with the PerForm 6 retrofit program. Now, for a limited time, the PerForm 6 retrofit program enables Cooper Power Systems customers to replace specified legacy recloser controls with new Form 6 pole mount, yard mount, or triple-single pole mount controls for a special price with an old Form 3A, Form 4A, Form 4C, FXA, FXB, or Form 5 control in exchange.

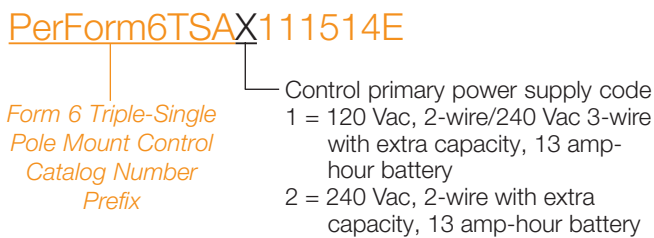

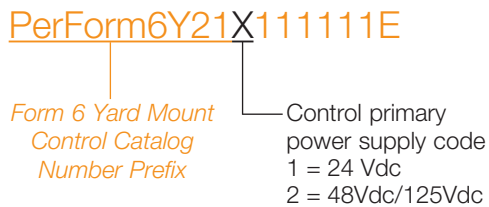

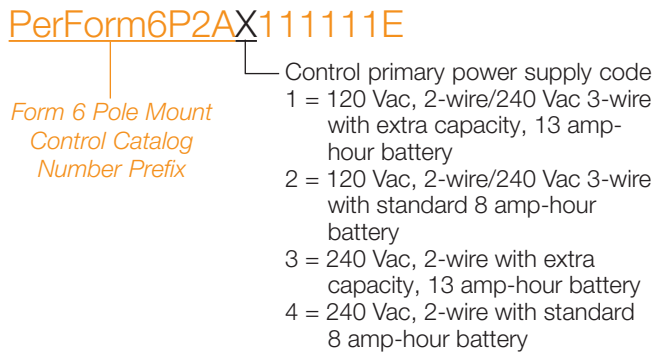

Contact your Cooper Power Systems representative for special pricing information.

The advantages of the PerForm 6 Retrofit Program extend beyond the technology— the burden of disposing your old control is eliminated.

Just box it up and send it back within 90 days with the special prepaid voucher!

Follow these Simple Steps to Superior Performance

1. Specify Cooper's PerForm 6 program as your control retrofit program choice. Build your part number from the appropriate table:

2. Submit your purchase order with the following terms stated: "Buyer (utility name) accepts a surcharge of \$2000.00 for each control not returned in 90 days or if returned in non-working condition."
3. When your Form 6 control arrives, prepare your retired control for return shipment to Cooper Power Systems.
4. Attach the provided RAK 606 return authorization sticker to the outside of your retired control prior to shipping.
5. Box up your old control and send it back on the prepaid shipping voucher.

Terms and Limitations

- All Form 3A, 4A, 4C, FXA, FXB, and Form 5 controls are eligible for the PerForm 6 retrofit program.
- Additional accessories beyond control base catalog number KME6P2A, KME6Y2, or KNTS6 are added at list. The Form 6 pole mount control for use with control-powered NOVA reclosers is not included in the PerForm 6 retrofit program.
- Cooper Power Systems reserves the right to assess a surcharge of \$2000.00 for each control not returned in 90 days or returned in non-working condition.
- Cooper Power Systems will assume the cost of returning retired control units to the factory only if shipment is returned via Yellow Freight and charged to the special RAK 606 account established for this purpose.
- PerForm 6 program discounts can not be applied to previous orders or be combined with other discounts.
- Cooper Power Systems reserves the right to discontinue this program without further notice.
